

Unacceptable Construction and Demolition Wastes Checklist

The Kansas Department of Health and Environment (KDHE) considers the following materials *unacceptable* for disposal in a construction and demolition (C&D) waste disposal area:

- Waste material containing friable asbestos
- Garbage
- Appliances from which ozone-depleting chlorofluorocarbons have not yet been removed in accordance with the provisions of the Federal Clean Air Act
- Electrical equipment containing hazardous materials
- Tires, drums, and containers even if such wastes resulted from C&D activities
- Processed tires (e.g., cut or baled)
- Mud trap wastes from businesses other than commercial car washes
- Processed wood which is considered to present a significant risk of adverse impacts to groundwater quality, including wood disposed from industrial manufacturing processes where wood is treated with creosote, oil-borne preservatives, or water-borne preservatives
- Bagged or bulk quantities of leaves and/or grass clippings
- Trash bags unless demonstrated to contain only acceptable C&D wastes
- Packaging wastes that are generated at retail establishments selling construction materials, chemical containers generated from any source, or packaging generated during maintenance of existing structures

If unacceptable wastes are observed and cannot be disposed in another permitted location at the Johnson County Landfill, driver may be supplied with the following contact information to locate an appropriate disposal facility:

KDHE – Bureau of Waste Management	(785) 296-1600
Johnson County Environmental Department	(913) 492-0402

If hazardous waste is observed, notify the KDHE – Bureau of Waste Management within 24 hours.
