

Dear Teachers,

Our school is participating in the One Earth, One Chance School Recycling Program this year to help educate children about the importance of recycling, and encourage more recycling among faculty and students. The program is easy, educational, and fun!

The One Earth, One Chance School Recycling Program was created by Deffenbaugh Industries, the metro-area's largest waste management company. Large recycling bins will be placed in the school parking lot and we will utilize these bins for collecting recyclable materials throughout the school. Members of the community can utilize the recycling bins to drop off recyclable materials, too.

I encourage you and your family to use the bins for any newspapers, magazines, office paper, soft drink cartons, #1-7 plastics and aluminum cans. The more we collect, the more we help ensure a sustainable future!

I'll be reaching out to you throughout the year to help share recycling tips and information with students to help them become more environmentally aware. Additionally, we have some classroom posters that discuss what can and cannot be recycled that I will be sharing with everyone. If you have any questions, please don't hesitate to let me know.

We think this is a very exciting opportunity for our students and school! Thank you for your support of this important initiative!
